Reflection

Do you feel "on track"?
I feel out of course. With recent personal developments it has been hard to cope up with the plan I have set up for myself.

What progress do you particularly feel good (great) about?
Creating an audio handling system. As I learn more about unity the more, I learn about how these UI/Game objects can be integrated into a proper software system rather than just components attached to W.E.T. code.

What barriers (if any) do you feel is/are a current impediment to success?
- More time – the knowledge that I need for this project is out there I would just need more time to sift through the quality content.

What help (if any) do you require to move positively forward?
N/A

What questions or concerns do you have (if any)?
N/A
